

### M & M (Modern And Metal)

These modern, metal doors by Jaroff Custom Entryways bring home design to your doorstep. These doors are fabricated with three layers of metal: a welded stainless steel inner core that is covered by a stainless steel skin and topped off with metal cladding. The outer cladding comes in stainless steel, copper, bronze or brass. The size, patina and finish can also be custom ordered. The doors are delivered pre-hung with a stainless steel frame that can be installed as a single door or a double door with optional sidelites and transom. Customers can choose from the five collections and two security options: a standard mortise lock or a five-point multi-lock system. **Circle 130 on inquiry card.**

### Peaceful Waters

The Solace Collection from Moen ShowHouse brings tranquil waters to the lavatory. Characterized by contemporary styling and a high arc, this chrome-finished bath collection comes with the option of a wall or a counter mount installation. The faucet handles are available in a cross handle or lever handle design which can be installed as a single-hole center set or two handle mount. Moen offers coordinating bath accessories — pivoting paper

holder, roman tub faucet, robe hook, towel bars and towel ring — that complete the transformation to a tranquil bathroom.

### Follow the Inglenook Road

Inglenook Tile has created a line of tile with a flashback to yesteryear. These antique reproduction tiles are crafted of fired red stoneware clay. Intended for outdoor or indoor use, these 3/8-inch thick ceramic brick pavers can be used in the patio or the kitchen. Designed to replicate the color variations and hand-formed appearance of wood-fired brick, they can be installed with or without grout. In addition to the standard red brick color, the tile can be ordered in a buff, taupe or light terra cotta clay color. The lighter colors are for indoor use only and come with an antiqued finish. Glazed finishes are available upon

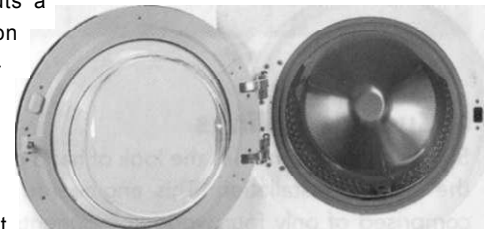

request. There is also a line of accent tiles that can be used in applications for the wall, fireplace or floor. The accent tiles come in a flat or raised relief pattern. Builders can choose from one of Inglenook's designs or custom order a more personalized design.

### Washing Dryer

LGE's large capacity washer and dryer combo puts a high-tech spin on laundry activities. This combination washer-dryer operates on SenseClean technology that programs washing and drying cycles according to fabric type and weight. SenseClean also features "Delay Wash" washing system that automatically sets water for optimal level. The larger unit has a 22-pound washing capacity and an 11-pound drying capacity. The size results in a reduction in wrinkling. The "Direct Drive" system operates on an inverter motor, which minimizes noise and conserves energy. Additional features include: child-lock system, drain filter and diagnostic system.
